*Student surveys are sent out by the Office of Institutional Research and Effectiveness (OIRE) in the year following graduation to capture employment information 6-12 months post-graduation

**Data for 2015 and 2016 graduates gathered from investigation or survey

***Expected Level of Achievement (ELA) 70% of graduates will be employed within the field of nursing within one year of graduation.

The University of Saint Francis sends a survey to all graduates six to twelve months after graduation. Based on those responding to the survey, information is collected regarding **graduate employment**. Due to low survey response rates from graduates the nursing department also attempts to verify employment directly with graduates.
